<b>Office Action Summary</b>	<b>Application No.</b> 10/549,374	<b>Applicant(s)</b> ITO ET AL.	
	<b>Examiner</b> Christopher S. Kim	<b>Art Unit</b> 3752	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election of Species G (figure 9, embodiment 7) in the reply filed on May 17, 2010 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 4, 7, 9, 11, 23-33, 37, 40, 42, 44, 56-66 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on May 17, 2010.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
4. Claims 1-3, 5, 6, 8, 10, 12-22, 34-36, 38, 39, 41, 43, 45-55 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claims 1 and 34 recite the limitation "an artificial weather controlling apparatus," in particular, "hours of sunlight or sunset time, which are varied in accordance with a season, latitude and longitude and control of an artificial weather controlling apparatus." The specification does not appear to teach an artificial weather controlling apparatus that varies the hours of sunlight or sunset time.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 12, 13-22, 38, 46-55 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 recites the limitation "the environment parameter detecting means" in line 8. There is insufficient antecedent basis for this limitation in the claim.

Claim 13 recites the limitation "the environment parameter detecting means" in line 11. There is insufficient antecedent basis for this limitation in the claim.

In claim 15, the recitation "the kind of the chemical...the volume and the remaining amount...the kind of a noxious insect...the optimum condition...the chemical discharge power" renders the claim indefinite.

Claim 38 recites the limitation "the means of the pump" in line 5. There is insufficient antecedent basis for this limitation in the claim.

The claims are replete with indefiniteness under 35 U.S.C. 112, second paragraph. The above is an exemplary listing. Applicant is required to review and

Art Unit: 3752

amendment all of the claims in their entirety to ensure full compliance with 35 U.S.C. 112, second paragraph.

***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. Claims 1-3, 8, 12, 34-36, 41, 45 are rejected under 35 U.S.C. 102(e) as being anticipated by Bryan et al. (7,213,772).

Bryan discloses a chemical diffusion apparatus comprising:

at least one chemical tank 18;

a discharging means 19;

a diffusing means 7;

a controlling means 8;

an environment parameter detecting means 3;

a time detecting means (start and stop periods, column 7, line 6).
